

Black History is American History. Black History Month 2023 Theme: Black Resistance For communities to be healthy, it is necessary everyone has access to quality healthcare. Those communities can then effectively and efficiently address racial health disparities and increase diversity in medicine. Healthy communities resist anything but Liberty and Justice for All. Black History is American History.

Rebecca Lee Crumpler, MD

endured various forms of disrespect and discrimination, **but she did not let that stop her**. She began her career as a nurse and later became the first black woman in the United States to receive an MD degree in 1864 from Boston Massachusetts's New England Female Medical College.

She wrote a book that dealt with children's and women's issues, **A Book of Medical Discourses: In Two Parts**, in 1883. It was for "mothers, nurses, and all who may desire to mitigate the afflictions of the human race."

Did you Know?

Dr. Daniel Hale Williams wouldn't take "no" or settle for "less than". Through his persistent drive, community partnerships and support, he founded Provident Hospital and Training School, the first black-owned hospital in America in 1891.

Dr. Daniel Hale Williams, a black man, performed the world's first successful heart surgery in 1893. How fitting that February is American Heart Month and also Black History Month.

February is National Children's Dental Health Month!

Dental Disease is preventable. Yet, the most common unmet health need of children is dental care. The American Dental Association reports about 20% of children between the ages of 5 to 11 have **at least one** untreated decayed tooth. Poor oral hygiene and lack of dental care can lead to Dental Disease.

Richland Public Health(RPH) is Accredited by the Public Health Accreditation Board, and promotes optimal health for the entire community. Equity is at the center of the 10 Essential Public Health Services (EPHS) which encourages active promotion of policies, systems, and overall community conditions that enable optimal health for all. Richland Public Health's "**Smile BIG Richland!**" **Pediatric Dental Health Program** serves all children aged 0-18 years-old. Each participant receives FREE age-appropriate dental hygiene products and dental health information to promote and support good dental and oral health.

February is American Heart Month

Cardiovascular Disease (CVD) is the No. 1 killer of Americans. HEART ATTACK SYMPTOMS SPOT STROKE SYMPTOMS F.A.S.T.

Chest Discomfort

Discomfort in the Upper Body

Shortness of Breath

Other Signs cold sweats, nausea or lightheadedness. FACE DROOPING ARM WEAKNESS SPEECH DIFFICULTY TIME TO CALL 911

If the someone has any of these symptoms, even if they go away, call 911 and get them to the hospital immediately.

Wear Red February 3rd ~ GO RED FOR WOMEN 3 need to know facts about women and cardiovascular disease 1. Cardiovascular disease kills more women than all cancers combined. It's the No. 1 killer of new moms. It kills 50,000 African American women annually. Yet, only 44% of women recognize it is their greatest health threat.

- 2.10% to 20% of women have a health issues like *high blood pressure, preeclampsia and gestational diabetes during pregnancy which greatly increases a women's risk for developing cardiovascular disease later in life.*
- 3.51.9% of high blood pressure deaths, otherwise known as hypertension or the "silent killer," occur in women, and out of all women, **57.6% of Black** *females have hypertension — more than any other race or ethnicity.*

Regularly check your blood pressure. Richland Public Health has made available Electronic Blood Pressure Monitoring Kits, at all locations of the

Mansfield Richland County Public Library and Shelby Marvin Memorial Library.

Borrow a kit with a valid library card and check yours today. Live Well Richland County!
