

HEALTH REPORT

Health news, statistics and information for Richland County

Smile BIG Richland!

Did you know, Dental Disease is **preventable?** However, the American Dental Association reports dental care is the most common *unmet* health need of children. About 20% of children between the ages of 5 to 11 have **at least one** untreated decayed tooth. Richland Public Health's "**Smile BIG Richland!**" **Pediatric Dental Health Program** has provided more than 600 **FREE** dental health backpacks to area children. Our mission is to educate and prevent the prevalence of tooth decay in youth between the ages of 0 to 18. This initiative is financially supported through the Richland County Foundation and donations from national and local organizations.

Early childhood tooth decay has become the most common chronic childhood disease impacting more children than asthma. According to the ADA, more than 40% of children have tooth decay by the time they reach Kindergarten. Children who suffer from the pain of oral health are three times more likely to miss school.

Contact Shane Myers, Health Educator at Richland Public Health, to receive a **FREE dental health backpack** for your children between the ages of 0-18. Call Shane at 419-774-3542 or email: smyers@richlandhealth.org. For additional information, go to richlandhealth.org/dental

CORONAVIRUS Information and Updates

Call **419-774-4700** for vaccine registration. Visit **richlandhealth.org/covid-vaccine-qa** for a list of area providers. Richland County has vaccinated 55,410 individuals with at least one dose and the state of Ohio has vaccinated 7,224,847 million individuals, as of February 28.

March is National Bleeding Disorders Awareness Month

Hemophilia is usually an inherited bleeding disorder in which the blood does not clot properly. Spontaneous bleeding as well as severe bleeding following injuries or surgery can occur. Blood contains many proteins called clotting factors that can help to stop bleeding. People with hemophilia have low levels of either factor VIII (8) or factor IX (9) which are proteins that cause bleeding to stop.

Approximately 400 babies are born with hemophilia each year in the U.S., however, the median age of a hemophilia diagnosis is 36 months. Richland Public Health's **Children with Medical Handicaps** program (CMH) can provide you a knowledgeable Public Health Nurse to help **coordinate**, advocate and assist with **access to diagnostic and treatment services** for your child with chronic medical conditions like Hemophilia.

Want to learn more about the CMH Program and qualifications? Call 419-774-4540 or Visit

Ohio Spring Severe Weather Awareness Week March 20th-26th

Be Prepared for Severe Weather

"If you don't like the weather, just wait a few minutes" -Mark Twain. Rapid temperature changes make perfect conditions for severe weather. **March 14-20th is Ohio Severe Weather Awareness Week.** While you cannot prevent severe weather, you can plan to be safe in an emergency.

- Show household members *where* your store your **Emergency Supply Kit** and *where* to seek **safe shelter**.
- Keep a three-day supply of bottled water and nonperishable food, necessary medication and appropriate clothing for each household member.
- Check and update as needed, your Emergency First Aid Kit.
- Know how and where to turn off water, gas and electricity if the need arises.
- Practice your household's safety plan for every type of weather.
 See more tips about severe weather and emergency supply kits at https://richlandhealth.org/personal/weather-safety-tips/

March is National Nutrition Month

March is National Nutrition Month. RPH's **WIC (Women, Infants & Children) Program** is a Federally Funded Health & Nutrition Program, for Pregnant, Breastfeeding, Post-Partum women and children up to age 5. WIC provides:

- Individualized nutrition counseling
- Help in finding health care
- Breastfeeding support and education
- Nutritious foods such as eggs, milk, cheese, yogurt, cereal, whole grain bread, brown rice, whole wheat pasta, fruits, vegetables and canned tuna fish or salmon if you are breastfeeding. Infant formula, baby food and baby cereal is also available.

Make proper nutrition part of your **Emergency Supply Kit.** Remember healthy choices when you prepare and update your nonperishable food items.

WIC is federally-funded by the United States Department of Agriculture.

Call for a WIC appointment: Richland 419-774-4560 or Ashland 419-289-3359.

The Richland Public Health "Health Report" is a monthly production of the Community Health & Prevention Sciences Division. Suggestions and corrections, including mailing label corrections, are welcome. Call Shannon Nelson, CHPS Coordinator, at 419-774-4761 or email snelson@richlandhealth.org

Richland Public Health is an equal opportunity employer/provider of serivces.
